 dev.=Std. Dev.  
 ab.=Abstention

### 1. Student Feedback for Miloser 101-1,2

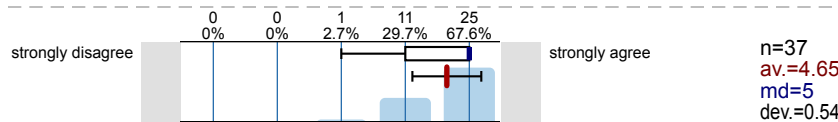

- 1.1) The instructor provided feedback on my academic work that was helpful to my learning.

- 1.2) The instructor assisted me when I had questions regarding course content during the semester.

- 1.3) The instructor established an environment that was conducive to learning.

- 1.4) What helped your learning the most in this course?

- Attending class
- Attending lab and asking questions.
- Detailed Instructions
- Easy grading
- Going through example problems in lecture and reviewing the topics for the lab right before we start.
- Going through examples in class.
- having a two portion lab and lecture
- Her explanations of the course
- Her knowledge of what usually trips people up, it was very useful to know what to pay extra attention to.
- Her productive attitude and slides
- I liked following along with the notes in class as the instructor filled them out. Over all, the course instruction for the class itself was good.
- Lecture and going through the problems
- Payton's easy going nature and the effort she put into class to help us learn. She deserves more credit for her hard work. She made stats understandable to me and not scary.
- Payton is a lovely instructor, please pay her a million dollars and give her a degree asap.
- Payton was very welcoming and made learning very fun and tried to include us in her life as well and I thought it was really good. I loved being able to get to know her and learn from her. She did an amazing job going over the notes with us and made sure we all understood

what was going on. This is the highest score i've ever gotten in a math class, thanks to her :)

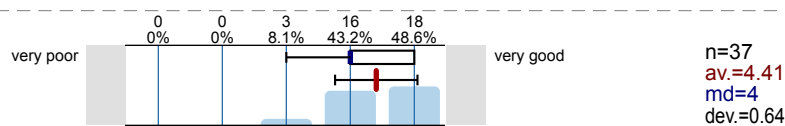

- Review days
- She explained everything in a way that made sense to me if I got confused when I asked her to confirm something or clarify, she said something in. A similar way and it clicked
- She posted all the notes online and answers to the homework so I could go back and review topics I needed too
- Showing up to lectures and lab
- the annotated notes
- the guided notes
- the homework
- The instructor's way of teaching helped a lot in this course since she was very nice and actually funny. She made sure we understood everything and would always work through any doubt we had.
- The instructor filling out the notes with us in lecture helps us a lot.
- The labs were SO helpful. Without them, I don't think I would have done so well on the exams.
- The notes and how they were set up to be easily understood.
- The note sheets. When I used the note sheets I was able to utilize them for assignments and then that helped me better understand what I was doing
- The notes sets were very helpful in the way they progressed through the material.
- The notes were really easy to follow and made it easy to study.
- The online homework we do especially the vocab and practice problems.
- The posted notes and the unit review sheets
- the pre-test reviews
- The weekly vocab quizzes helped me recap what we learned in lecture each week.
- Uncertain
- Using the fill-in notes to have during lectures, when Payton was giving the lecture, I could follow along and understand the material while following along with her. The online homework and vocab quizzes also helped me an extreme amount when trying to understand some of the difficult material for me.
- We did a lot of in class examples

1.5) What changes could have been made to enhance your learning in this course?

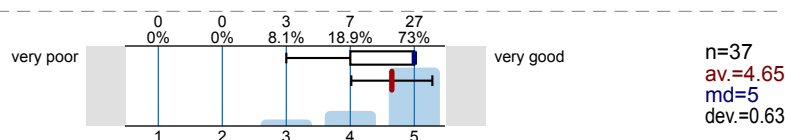

- A bit more time covering the definitions since they can easily become confusing.
- class more interesting
- Having a bit less workload would have been less stress-inducing. The JMP software was also hard to understand at the beginning of the course so for new students, there should a bit more help with that. After some time, it was fine though.
- Honestly nothing, I loved this class and did a very good job on teaching.
- I and many other students did not find the lab to be helpful. The instructor for the lab did not explain the topics very well and was not helpful with answering questions about the lab assignments or the JMP program. In general, the instructor of the lab was not useful and the environment was not very conducive to learning.
- I can't think of any changes to be made
- I don't believe I have any changes for the course that would help enhance my learning.
- I felt that some days were drawn out or at a slower pace when we could have gotten more done in one day
- I think if the online homework and vocab was always due at midnight on Fridays, it would be better.

- I would change the time or expectedness of the labs, some people are busy with other classes or other things at the time and were not able to make the lab which affected their grade
- Less busy work and more applying what we learned.
- Less homework
- More practice in class
- More thorough explanations of the content
- More worked through examples in the notes
- N/A (3 Counts)
- n/a
- Na
- none
- None (2 Counts)
- nothing (2 Counts)
- Nothing that I can think of.
- Payton did a wonderful job teaching this course! I would like to see her be more confident because she knows her stuff and is a good instructor!
- Posting all lab dates to students would make life easier. I feel like we never had complete confirmation if we had lab or not.
- Posting the lab schedule to avoid confusion
- The course is great, I see no room for improvement.
- The lab was really long every week and I didn't learn as much in it.
- The only thing I would suggest is if we have time for a review day before an exam to create more example questions to go over as a class, especially for units 2 and 3.
- This could have been a scheduling thing, but sometimes we started new chapters before we took the last chapters test would was kind of confusing
- Walking through more examples in class.
- When we are having lectures, I think something that would have enhanced my learning is actually doing more problems, step by step. Otherwise, I enjoyed it!

1.6) My overall rating of this course is:

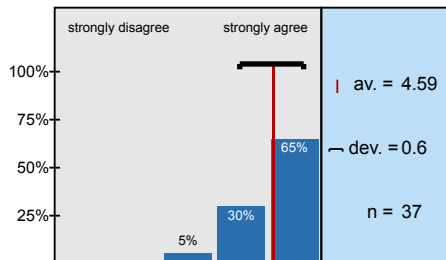

1.7) My overall rating of the instructor is:

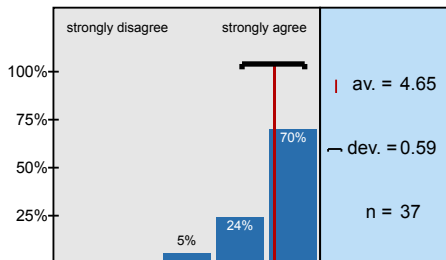

# Histogram for scaled questions

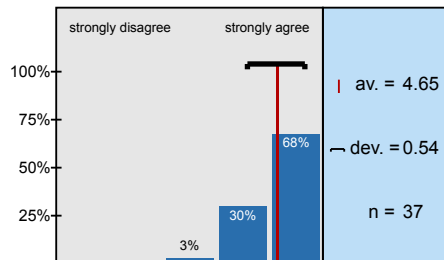

The instructor provided feedback on my academic work that was helpful to my learning.

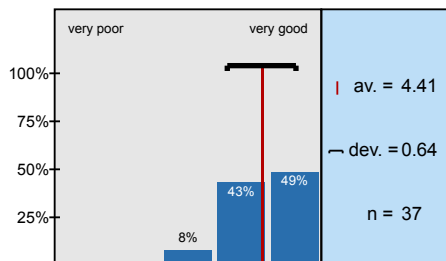

The instructor assisted me when I had questions regarding course content during the semester.

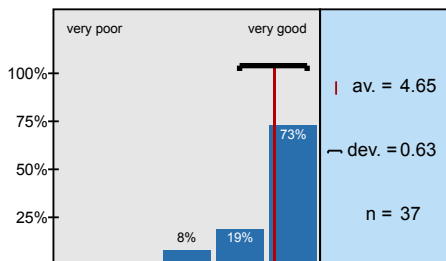

The instructor established an environment that was conducive to learning.
